## BASIC PRINCIPLE OF SCR SYSTEM

## Diesel Exhaust Fluid Pump

AD Blue is driven to make the urea in the urea tank spray into the exhaust pipe with a proper amount in real time Pressure sensor senses the pressure of the urea solution and give feedback to the DCU.

### Features and advantages;

|   |                             |
|---|-----------------------------|
| SCR system  | Airless AD Blue             |
| Application type  | Diaphragmatic Type          |
| Low noise   |                             |
| Application solution  |                             |
| Vehicle Urea  | (Concentration:31.8%-33.2%) |
| Measuring pump self-contained heating function, when the temperature reach a certain value, it wil automatically activate the heating function. |                             |
| Performance characteristics:  |                             |
| Voltage range   | 12-24V                      |
| Temperature range   | -40~70C                     |

**UREA DOSING MODULE UREA INJECTOR**

- Unique Patented Design
- Strong Resistance To Crystallization
- Strong Anti-clogging Ability
- High Reliability And Long Service Life
- Super Atomization Performance
- Excellent Product Quality
- Save Urea
- High Injection Accuracy
